DETAILED ACTION

Examiner's Statement of Reasons for Allowance

- 1. Claims 1-24 are allowed over prior art.
- 2. This action is in reply to applicant's correspondence of 14 August 2006.
- 3. The following is an examiner's statement of reasons for the indication of allowable claimed subject matter.
- 4. As per claims 1,2 and 16 generally, prior art of record, Ellington et al, U.S. Patent 6,708,218 B1, fails to teach alone, or in combination, other than via hindsight, at the time of the invention, the features as discussed and remarked upon in the response of 8/14/2006 to office action of 4/13/2006.

Specifically, (as per claim 1, for example) prior art dealing with Ipsec security via various inter and intra segment/layer application of security protocols/security policy segmentation schemas, and associated serial processing aspects, is generally known to exist, (i.e., Zhang, Yongguang, 'A Multi-Layer IP Security Protocol for TCP Performance Enhancement in Wireless Networks' IEEE JOURNAL ON SELECTED AREAS IN COMMUNICATIONS, 2004, entire document, http://www.cse.psu.edu/~gcao/teach/514/jsac04.pdf). Nowhere in the prior art is found collectively the *italicized* claim elements (i.e., *parallel* processing at a *layer basis* using *distinct security* policies/protocols and said parallel processing is at least a function of sufficient information uncovered during at least the first layer protocol/policy processing), at the time of the invention; serving to patently distinguish the invention from said prior art;

Application/Control Number: 10/053,904

Art Unit: 2136

"1. A method of processing a packet having a plurality of layers wherein a first layer is structured in accordance with a first protocol and a second layer is structured in accordance with a second protocol, comprising:

processing the first layer of the packet in accordance with

the first protocol and

a first security policy; and

processing the second layer of the packet in accordance with

the *second protocol* and

a second security policy

at least partially in parallel with

processing of the first layer of the packet when

processing of the first layer of the packet uncovers

sufficient information to support security processing of

the second layer of the packet."

5. Dependent claims 3-15, 17-24 are allowable by virtue of their dependencies.

Art Unit: 2136

Conclusion

6. Any inquiry concerning this communication or earlier communications from examiner should be directed to Ronald Baum, whose telephone number is (571) 272-3861, and whose unofficial Fax number is (571) 273-3861 and unofficial email is Ronald.baum@uspto.gov. The examiner can normally be reached Monday through Thursday from 8:00 AM to 5:30 PM.

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami, can be reached at (571) 272-4195. The Fax number for the organization where this application is assigned is **571-273-8300**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. For more information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
